

Session 2

Sprints (Sprint Planning and Retropectives)

Purwadhika

What is Sprint ?

Sprint or Sprint Planning in Scrum is the process of discussing what jobs each member will do.

Sprint Topics

- **What are the goals of running the Sprint?**
- **What are the processes that need to be done to achieve the Sprint goals?**
- **Who will do each job?**
- **How long will it take to reach a goals?**

Sprint Period

The sprint period is usually free determined by team agreement. Ideally, the fastest sprint period is one week and the maximum is one month.

Daily Standup

The daily standup to monitor the progress of each team member. The fastest is 5 minutes and the longest is 15 minutes.

Retrospectives

Team performance evaluation process when all sprints have been completed and project goals have been achieved.
